📜 Project Title: School Management System (Basic Admin-Teacher Portal)

📌 Project Brief:

Build a Django web application to manage a school's basic operations. The system should include two types of users:

1. **Admin** (can manage teachers)
2. **Teacher** (can manage their students)
3. **Authentication:**

    o Signup (with role selection: Admin or Teacher)

    o Login (Sign in)

    o Logout

    o Change Password

4. **Custom User Model:**

    o Use Django's AbstractUser to create a custom user model.

    o Add a role field with two choices: admin and teacher.

5. **Role-Based Access:**

    o Admin can:

        ▪ Create, read, update, and delete Teacher accounts.

        ▪ View all students (read-only).

    o Teacher can:

        ▪ Perform CRUD operations on their own students.

6. **CRUD Operations:**

    o Admin: Manage teacher accounts (CRUD).

    o Teacher: Manage student records (CRUD).
